Dear Interested and Affected Party

N’Komati Anthracite Mine is an existing opencast strip and underground mining operation owned by Nkomati Anthracite Mine (Pty) Limited under Afrimat Limited situated in the Mpumalanga Province of South Africa, approximately 52 kilometres south of Komatipoort and 10 km east of Mzinti. The Mine is currently abstracting anthracite by means of both underground and opencast mining methods at the Mangweni and Madadeni Operations. Ore is hauled via trucks to the existing Beneficiation Plant, where it is washed and sorted and transported to clients. The proposed activities are required in order to ensure that N’Komati Anthracite Mine can access the required volumes of anthracite at their existing Mangweni and Madadeni operations.

- Opencast mining areas (Block L larger area, Madadeni and Mangweni Mining Area)
- Expansion of the previously approved Madadeni Underground Area
- Supporting Infrastructure (Overburden Stockpiles, Discard Dump, Berms and Haul Roads)

Kindly find attached a copy of the Background Information Document which provides further information on the proposed project. You will also be informed on the availability of the Draft Scoping Report.

We look forward you your participation.

Kind Regards

*Kirithi Peramaul*
